WORK EXPERIENCE

Backend Developer | Node.js Rounded LLC [🔗](#)

04/2023 - Present

Tashkent, Uzbekistan

Development of websites and mobile applications

Click Jobs

- To Create RESTAPI for mobile applications
- My task is to create api : api includes auth , job creating , user features like applying jobs posts and tracking them . there is also superadmin who can control posts and users .
- Used technologies : Node.js , Express.js , Sequelize.js , JWT , Auth 2.0 , Postgresql , AWS Es2 Ubuntu virtual machine, Postman , Multer

intern

It-time(education center)

10/2022 - 12/2022

Tashkent

It's for the education center. I'm thrilled that worked on this project. I have learned a lot of new things such as ORM, Postgresql etc

Achievements/Tasks

- Groups section (CRUD in Postgresql and Expressjs)
- Users section (CRUD in Postgresql and Expressjs)

Back-end developer (volunteer) web-collection

09/2022 - 10/2022

remote

we have created a web collection that stores images, posts, etc. I learned in this project how to work with team , how to create API for real users.

Achievements/Tasks

- collections (CRUD in Nodejs and MongoDB)

SKILLS

Typescript

Nest.js

Prisma

C++ (fundamental)

JavaScript

Node.js

Express.js

Mongoose(ODM)

MongoDB

git

github

Postgresql

Sequelize.js

PERSONAL PROJECTS

To-do (10/2022 - 11/2022) [🔗](#)

- CRUD for practice
- technologies - Node.js , express.js , MongoDB , mongoose , jwt
- It's my first project and I was able to create only CRUD
- What I have learned are **Node.js threads , events loops , call stack , express.js middlewares , express.js router , req and res objects , get & post & delete & put methods and MongoDB Atlas**

Avito.ru Clone (02/2023 - Present) [🔗](#)

- Technologies : **Node.js || Express.js || PostgreSQL || Sequelize || EJs (for UI) || Jsonwebtoken**
- I have built this project to understand **Relations in Postgres and How they are used in real world**
- I used **EJs to render data to Clients**
- What I have learned are **One-to-Many , One-to-one and Many-to-many relations in Postgres and ORM**

Tasklify (03/2023 - Present) [🔗](#)

- Technologies : **Node.js || Express.js || MongoDB || Mongoose || EJs (for UI) || Jsonwebtoken || Session and Cookies**
- I used to use 'pomodoro' (<https://pomofocus.io/>) then I decided to create my own to-do app .
- What I have learned are how to save memory in database, how to design our project and how to use **session and cookies** and what are they , **http and https , AWS , pm2 , JPRQ**
